

7 New QC Tools (Management Tools)

COURSE DURATION: 2 days

COURSE OBJECTIVE: The purpose of this course is to create awareness of 7 new QC Tools. This course will definitely help the participants to develop strategies and solve the current management problems. These tools are applicable not only to the quality problems but also to all type of management related problems. Apart from problem solving these tools can also be used for strategy finalization and policy deployment.

We also undertake consultancy projects on this subject. Analysis of any type of chronic or severe problem is carried out. Feasible solutions are drawn in discussion with the organization.
